Tree & Shrub Food

Specially designed to meet the needs of ornamental shrubs and trees.

Directions:
Use 1/2 cup for every newly planted shrub, mix into soil thoroughly.

Best applied twice per season; once in the early spring and secondly in early August. Apply at a rate of 2 lbs. per 80 sq. feet for each application.

Broadcast around shrub bed and incorporate (scratch into soil) into the top two inches of soil. Be careful not to disturb the roots. If roots are too shallow, water the fertilizer into the soil.

For larger trees and shrubs, broadcast under rain drip canopy of each individual tree or shrub at the above rate. Water the fertilizer into the soil thoroughly.

All ingredients are derived from plant and animal by-products.
